G. Nishita Sri

BSC CS STUDENT | ASPIRING SOFTWARE ENGINEER

ABOUT

I'm a BSc Computer Science student (1st year) enrolled in the BITS Pilani Online program, currently developing practical skills through the NIAT skill training program. My learning journey includes Python, JavaScript, HTML, CSS, and Data Structures & Algorithms, along with a strong focus on English communication and professional skills. I believe in learning through consistency, practice, and real-world application. I'm motivated to keep

Made in Framer

building projects, strengthening my fundamentals, and growing step by step as a future software professional.

EXPERIENCE

Student Trainee – NIAT Skill Program

Currently undergoing structured training in Python, JavaScript, HTML, CSS, and Data Structures & Algorithms, with an emphasis on building strong programming fundamentals

Applying learned concepts through hands-on practice, coding exercises, and beginner-level projects

Developing problem-solving and logical thinking skills through consistent practice of algorithmic concepts

Actively improving English communication and professional skills to enhance collaboration and workplace readiness

Academic Learning – BSc Computer Science

BITS PILANI (ONLINE) | ONGOING

Pursuing a Bachelor of Science in Computer Science with a focus on core computing concepts and analytical thinking

Strengthening foundational knowledge in computing through coursework and independent study

Building discipline, time management, and self-learning skills in an online academic environment

FEATURED PROJECTS

Technologies: HTML, CSS, JavaScript, Python

Made in Framer

Designed and developed a responsive personal website to professionally present academic background, skills, projects, and certifications Implemented structured layouts, smooth navigation, and basic interactivity using JavaScript Focused on clean UI design, accessibility, and maintainable code structure.Created multiple Python programs to practice core programming concepts including variables, conditionals, loops, functions, and basic data handling Solved logical problems and real-world inspired tasks to strengthen problem-solving skills Improved code readability, modularity, and debugging techniques

EDUCATION

BACHELOR OF SCIENCE (BSC) IN COMPUTER SCIENCE | BITS PILANI (ONLINE)

NIAT Skill Development Program

UNDERGOING INDUSTRY-ORIENTED TRAINING IN PYTHON, JAVASCRIPT, HTML, CSS, AND DATA STRUCTURES & ALGORITHMS

ACTIVELY DEVELOPING TECHNICAL PROFICIENCY AND PROFESSIONAL COMMUNICATION SKILLS

APPLYING LEARNED CONCEPTS THROUGH HANDS-ON PRACTICE AND PROJECT-BASED LEARNING

SKILLS

PROGRAMMING LANGUAGES

- ***Python***
- ***JavaScript***

WEB TECHNOLOGIES

- ***HTML5***

Made in Framer

- *CSS3*

PROFESSIONAL & COMMUNICATION SKILLS

- *English Communication*
- *Presentation Skills*
- *Team Collaboration*

LEARNING & DEVELOPMENT

- *Consistent Learning*
- *Time Management*
- *Adaptability*

AWARDS

Academic / Innovation Event

- *Secured **3rd position** in an Ideathon by presenting an innovative idea focused on problem-solving and practical application*

Microsoft
(Through Government Skill Development Initiative) | Ongoing

- *Currently enrolled in the **AI to Aspire** course designed to build foundational understanding of **Artificial Intelligence concepts***
- *Learning industry-relevant skills aligned with emerging technologies and future career pathways*
- *Participating through a structured **government-backed skill development program**, ensuring credibility and standard learning outcomes*

NIAT SKILL DEVELOPMENT PROGRAM

***NIAT** | Ongoing*

- *Actively completing training in **Python, JavaScript, HTML, CSS, and Data Structures & Algorithms***

Made in Framer

- *Developing both **technical proficiency and professional communication skills***
- *Recognized for consistent participation and progress*
